

AQUANOVA 25-5-25

AQUANOVA 25-5-25 powder fertilizer by Almada Manufacturing Company is a balanced formula containing a wide range of essential macro and micronutrients. The nitrogen content plays a vital role in promoting optimal vegetative growth, while the potassium supports fruit development and grain filling. The presence of phosphorus is especially crucial during early growth stages due to its limited mobility in the soil and restricted root expansion. This results in a stronger and healthier root system. This high-quality product is suitable for use in foliar spraying, fertigation, and hydroponic systems.

APPLICATION RATES & TIMING

Crop Type	Fertigation Rate	Timing
Fruit Trees	100–150 g / tree	Throughout the growth season, especially at early vegetative and reproductive stages
Field Crops	12–16 kg / hectare	
Vegetables	20–40 kg / hectare	
Greenhouse Crops	20–40 kg / hectare	

GUARANTEED ANALYSIS

Macronutrients (% w/w)						
pH	Sulfur (S)	Total Nitrogen (N)			Phosphorus (P ₂ O ₅)	Potassium (K ₂ O)
		Ureic Nitrogen (NH ₂)	Nitrate Nitrogen (NO ₃)	Ammoniacal Nitrogen (NH ₄ ⁺)		
3	0	5	15	5	5	25
