

AQUANOVA 5-5-40

AQUANOVA 5-5-40 powder fertilizer by Almada Manufacturing Company contains various macro and micronutrients. Among the primary macronutrients, it is particularly high in potassium. This formula is highly versatile and can be applied multiple times throughout the growing season, depending on the crop type and season. The higher potassium content enhances the absorption of other nutrients by plants. This high-quality product is suitable for foliar application, irrigation systems, and hydroponic systems.
