

NUTRICH SUPER POTASSIUM HUMATE 80

NUTRICH Super Potassium Humate 80 is a 100% organic and water-soluble soil conditioner designed to significantly improve soil fertility and plant resilience. With a high concentration of active humic substances, this product enhances seed germination, strengthens plant tolerance to drought and environmental stresses, and boosts both the quality and yield of agricultural crops. Its high cation exchange capacity (CEC) facilitates nutrient uptake and overall plant vigor. Suitable for both foliar application and fertigation, this product is ideal for sustainable and organic farming practices.

POTASSIUM HUMATE

Manufactured in China 

APPLICATION RATES & TIMING

Crop Type	Foliar Application (per 1000 L water)	Fertigation Rate (kg / ha)	Timing
Cereals	0.6–2.5 kg	3–4 kg	Foliar: After germination Fertigation: Entire growth period
Vegetables & Cucurbits	0.4–2.5 kg	3–5 kg	Foliar: 7–10 days after germination Fertigation: Entire growth period
Oil Seeds	0.8–2 kg	3–5 kg	Foliar: After germination Fertigation: Entire growth period
Fruit Trees	0.6–2 kg (repeat 3–5 times)	5–6 kg	Foliar: After germination Fertigation: Entire growth period
