

AQUANOVA SEAWEED EXTRACT

AQUANOVA Seaweed Extract, produced by Almada, contains high quality amino acids and 18% alginic acid. This valuable compound is derived from marine sources and plays an essential role in improving root growth and soil health. AQUANOVA Seaweed Extract is also rich in essential nutrients such as nitrogen, phosphorus, and potassium, providing balanced and effective nutrition for plants. This product enhances plant resistance to environmental stress, improves performance, and boosts product quality. It is suitable for use in all agricultural systems, including field crops, horticulture, and greenhouse cultivation.

Manufactured in Jordan
